1. INTRODUCTION

This API is used for check status of the transactions

2. HOST COMMUNICATION AND API SECURITY

API calls initiated by partner host to follow the API specifications, as described in the sub-sections below:

Request : application/json
Response : application/json

3. API LIST

The purpose of this API is to check transaction status.

ENDPOINT: /mosapi/api/check-status

Request Parameters:

Parameter	Description	Sample	Required
userId	userId isprovided by Mosambee	173275	No
billNumber	Bill Number (client reference number)	Bill1234	No
transactionId	TransactionId of Mosambee	12324	No
merchantId	Merchant Id provided by Mosambee	MER1234	Conditional
checksum	Generated using the provided formula		Yes
appIdentifier	Search with billNumber	1	No
enterpriseCode	Enterprise code provided by Mosambee	ENT1234	Conditional
fetchType	Used to fetch using different parameters (userId/terminalId)	userId / terminalId	No
terminalId	Terminal ID	TID1234	No

Validation Rules :

- Either merchantId or enterpriseCode is mandatory.
- If AppIdentifier = 1, then billNumber is mandatory.
- If transactionId is provided, then billNumber, userId, or terminalId is not required.
- If fetchType = userId, userId must be provided.
- If fetchType = terminalId, terminalId must be provided.

Note –

- Transactions can only be verified using billNumber and merchantId or enterpriseCode on the current transaction day. For the next day, transactionId must be provided.
- Clients must handle failed transactions. If a client manually cancels a transaction or does not receive a success response, they should use this API to verify the transaction status.

Response Code	Payment Response Code	Message
CPOCB16	1	Unable to process your request, retry.
CPOCB16	1	Transaction Declined by User.

Checksum generation

MerchantKey or enterpriseKey **:** will be provided on email.

Concat below fields and generate sha512 of it

SHA-512 (userId + billNumber + transactionId + merchantId + merchantKey/enterpriseKey)

SAMPLE REQUEST AND RESPONSE

Request:

```
{
    "userId": "",
    "billNumber": "",
    "transactionId": "292854457108",
    "AppIdentifier": "",
    "merchantId": "",
    "enterpriseCode": "QQ11685",
    "fetchType" :"",
    "terminalId" :"",
    "checksum":
    "6a7f0000c32673e6a77cd62d3489bdfca1dcc6509f7a03d6168fc8fefb11796ede86c273af61bfa82b2
    06d1a9848ca6deb19f0fb42ef7422f951b35b7c918ace"
}
```

Response:
